

JOHN RODRIGUES

Full Stack Developer

SUMMARY

I am a full stack developer with experience in systems and web development, working across the entire software development lifecycle: requirements, prototyping, development, testing, deployment, and maintenance. I have experience in systems analysis, application integration, and a strong focus on architectural best practices, scalability, and maintainability.

I am proficient in PHP, JavaScript (Node.js, TypeScript), Python, HTML, CSS (SCSS/SASS), as well as frameworks like AngularJS, Angular (v16-v19), ReactJS, and NextJS. I have knowledge of SQL, Git, Bitbucket, Scrum, Kanban, Docker, and the ELK Stack.

Analytical and proactive profile, focused on problem-solving, continuous learning, and career growth in software architecture and technical leadership.

WORK EXPERIENCE

Full Stack Developer

G4F — Brasília DF

1 year 10 months | 2026

- Development and maintenance of web applications for the Ministry of Foreign Affairs, ensuring performance, scalability, and stability.
- Handling critical demands and implementing new features in line with evolving requirements.
- System maintenance, optimization, and refactoring using PHP (Zend, Doctrine), Node.js (NestJS), SQL Server, and PostgreSQL.
- Interface modernization and user experience improvements using AngularJS and ReactJS.
- Utilization of Docker, Git, Bitbucket, and Jira within agile environments running Scrum and Kanban.
- Continuous monitoring with the ELK Stack, preventing incidents and enhancing system performance.

Full Stack Developer

Decisão Sistemas — Goiânia Go

1 year | 2023 – 2024

- Software development from conception to delivery, focusing on quality, performance, and usability.
- Continuous system maintenance, ensuring stability and ongoing product evolution.
- Collaboration with multidisciplinary teams and stakeholders to transform requirements into practical solutions.
- Creation of backend services and frontend interfaces using AngularJS and Node.js.
- Interface design and prototyping using Figma.

SEO/CRO Analyst

Media.Monks – Sorocaba SP

1 year 6 months | 2022 – 2023

- Frontend development and API integration for web applications.
- Maintenance and evolution of e-commerce platforms such as VTEX Legacy, VTEX IO, TrayCorp, WordPress, Deco CX, and Salesforce.
- Planning and execution of SEO and CRO strategies to drive traffic and increase conversion rates.
- Conducting internal training sessions and presenting data/results to clients and internal teams.
- Working with agile methodologies (Scrum and Kanban) and tools like Trello, ClickUp, Clockify, and Miro.
- Development utilizing HTML, CSS, JavaScript, TypeScript, PHP, and Python.

EDUCATION

Postgraduate Degree in Software Architecture, Data Science, and Cybersecurity (In Progress)

Pontifical Catholic University of Campinas (PUC Campinas)

Expected Completion: December 2026

Bachelor's Degree in Computer Science

Estácio de Sá University

Completion Date: June 2026

Postgraduate Degree in Software Engineering

Anhanguera Educacional

Completion Date: 2023

Bachelor's Degree in Management Processes

Estácio de Sá University

Completion Date: 2022

LANGUAGES

English

Spanish

Portuguese

TECHNICAL SKILLS

Backend

- Node.js (NestJS)
- PHP (Zend Framework, Doctrine)
- Python

Frontend

- JavaScript (ES6+), TypeScript
- React.js, Next.js
- AngularJS, Angular (v16+)
- HTML5, CSS3, SCSS, SASS
- Tailwind CSS, Bootstrap

Databases

- PostgreSQL, MySQL, SQL Server, MongoDB

DevOps & Tools

- Docker
- Git, Bitbucket
- Jira (Scrum/Kanban)
- ELK Stack (Elasticsearch, Logstash, Kibana)

Everyone on the Web: Best Practices for Digital Accessibility

- Training: Accessible Web Application Development
- Web Accessibility
- WCAG 2.1 Guidelines
- Semantic HTML
- Accessibility Best Practices
- SEO Optimization & Core Web Vitals

Others

- REST APIs, SOAP, JSON, XML
- CMS (WordPress, VTEX Legacy and IO, Salesforce, Plone)
- Figma (UI/UX prototyping)

Data and Automation Analyst

Ministry of Transport – Brasília DF

1 year | 2021 – 2022

- Management and maintenance of PostgreSQL and MySQL databases.
- Development of Data Lake solutions for data storage and analysis.
- Creation of automation solutions using Python, Power Automate, and Power Apps.
- Dashboard creation and data analysis using Power BI and Excel.
- Maintenance of microservices and enterprise applications.
- Web design activities and digital interface improvements.
- Web development using HTML, CSS, JavaScript, and CMS content updates in Plone.
